

Metronet's internet is coming to your neighborhood.
And, you're going to love it.

metronet[™]
love your internet

We provide **100% fiber-optic** internet and phone services, and soon, you'll have access to some of the fastest internet speeds in the world.

Following this letter, you can expect:

- **A postcard reminding you construction will begin soon.**
- **Large Metronet construction signs at your neighborhood's entrance and smaller signs near your mailbox.**
- **Pink flags and temporary paint marking existing underground utilities.**

We understand you may have questions. Here are some answers to the questions we hear most frequently:

[Q] I have a sprinkler system, dog fence, sump pump line or other underground item. What do I need to do to make sure these items are marked and avoided during construction?

[A] It is very important to notify us of these items. You can either mark them with pink flags or landscape-safe spray paint, or report them at metronet.com/construction by clicking the "Ask Questions" tab.

[Q] Does Metronet have permission to be on my property?

[A] Metronet has the legal right to access the designated utility easements typically located within a strip of land running along the street, the sidewalk, the rear lot line, or between two lots. If the easement is within a fenced-in yard, crews will need your help accessing this area.

[Q] When can I remove the utility marking flags and/or paint in my yard?

[A] Markers and paint need to remain in place until construction of the network is complete.

[Q] Will Metronet restore the area in which they performed construction?

[A] Our crews make every effort to minimize impact to properties. Once construction is complete and weather permits, Metronet will restore lawns in areas where digging occurred.

Metronet is committed to making this construction phase as easy as possible for you and your neighbors. Our construction website and customer service line are available to address any additional questions or concerns.

Construction Website:
